years ending December 31, 1985. Among the 43 patients receiving 49 platelet transfusions during a prospective, controlled study of platelet administration, the seven transfusions performed with Accel (Nycomed, Oslo, Norway) resulted in all patient units being transfused without the need to change the sterile filter bag. Three

of the seven platelet transfusions were made with Accel and in all cases the platelet count increased above 20,000/mm<sup>3</sup> within 24 hours. Among the 51 patients treated with platelets collected from the donor pool, 16 patients received platelet transfusions at least once with Accel. The remaining 34 transfusions were

---

performed using a standard technique with a conventional filter bag. Mean platelet counts ranged from 25,000 to 45,000/mm<sup>3</sup> during the transfusion. The Accel procedure was used in these 34 patients because of donor platelet availability; in 22 of these 34 cases, Accel was administered as part of an intensive

Make quick and easy

AutoCAD 2023 marks  
up your drawing as you  
make changes, making

---

it easier to incorporate feedback. (video: 3:18 min.) When AutoCAD is used on a computer, changes you make may have unexpected results. The current version of AutoCAD does not mark up your drawings automatically as you make changes, so you can't easily incorporate feedback or make changes to the model if you later

---

decide the result isn't what you intended. In AutoCAD 2023, we are introducing the ability to mark up your drawing as you make changes and easily incorporate feedback, making it easier to incorporate your ideas. Markup Import and Markup Assist provide these new capabilities in the following ways. Markup Import. Mark

---

up your drawing with comments and notes, and quickly send your drawing to a partner or online community.

(video: 2:36 min.) A new command, Import, enables you to incorporate feedback from printed paper or PDF files, as well as from online communities, in a standard AutoCAD format. Import brings

---

in the information in a manner consistent with how AutoCAD currently imports text objects and objects such as dimensions and line styles. AutoCAD interprets the comments and notes as text, and uses them to produce a text markup. Import also handles text that you type in a chat window or a drawing that you create

---

in an online community. This enables you to send your comments, questions, and suggestions to a partner or community, and incorporate those suggestions into your drawing in a manner consistent with how you currently incorporate feedback. New contextual menu items enable you to

---

take actions with the comments, notes, and notes you import. The commands available in this menu include marking the comment or note as a draft or comment and moving the comments to a new layer. You can also add comments or notes directly to a command or parameter value using the new "Add" command. You can

---

also combine comments and notes using the new Combine command. If you have comments and notes in a text file or an online community, you can include these comments or notes in your drawing with a single click. The Import menu also enables you to email a file with comments and notes. This enables you

---

to send a drawing that has comments and notes to a partner or online community.
