It is a comprehensive application which allows you to create reports based on the information entered by you. You can easily modify values of employees as you type, monitor your employees' income and easily create reports based on the data entered by you. The Fitness Database is a simple and useful tool for tracking your sports activity and fitness. It allows you to design, manage and save your workouts, track your progress and keep records of sports activities in a private database. Available options The application allows you to save a maximum of 20 workouts and track them one by one. However, the frequency of workouts can be changed as you type. For example, you can select from a menu of workouts which are repeated daily, weekly or monthly. Moreover, you can view the amount of time it takes for a workout to be completed. You can access and customize your workout by choosing from among 6 categories, which include: Cardio, Strength, Strength cardio, Sports, Yoga and Spinning. Personal data and workouts The application allows you to save a basic personal data and track your workouts in a detailed fashion. The tool can hold a maximum of 25 exercises, which can be customized according to their types and settings. These can include weight, repetitions, sets, time, order, and frequency. Additionally, you can select from a menu of exercises to record how much time you spend on them. You can add workout plans by combining several exercises in a day. Moreover, you can mark your workout, include a comment and personalize it. You may also update the number of repetitions, sets and exercises. Another important aspect of the application is the ability to enter the amount of time it takes to complete a workout. Furthermore, you can enter the caloric and fat burn values of your workout, as well as the amount of calories you
