Nov 22, 2015 Middle-earth: Shadow of Mordor - Delivering the Vengeance On January 22, 2014, Warner Bros. Interactive Entertainment and Monolith Productions released a new webisode titled "Join the Conversation" in which the developer and executive producers of The Hobbit: The Battle of Five Armies, Philippa Boyens and Peter Jackson discuss their decision to make a game based on the film version of The Hobbit. They also discussed their approach to Middle-earth video games, noting that they wanted to embrace some of the game aspects of Middle-earth while still keeping it to the more familiar fantasy themes that are present in the novels and films, referring to the game as one that would be in a fantasy world but be very familiar with Middle-earth. The game features the titular character Tintin, who must help the protagonist, the Knight of the Forgotten Grain, rescue the Professor. The player controls Tintin and his pet dog Snowy from a third-person perspective. The game's combat system is largely adapted from the light sabre combat used in The Lord of the Rings: Conquest, with players using the weapons and abilities that Tintin and Snowy have collected, rather than relying solely on their blades. The game also uses a hack and slash system similar to the ones used in The Hobbit: An Unexpected Journey, The Hobbit: The Desolation of Smaug, and The Hobbit: The Battle of Five Armies. Tintin: The Game was developed by the Danish company Kongregate, which was acquired by Warner Bros. Games in April 2013. The game was published by Warner Bros. Interactive Entertainment, and Warner Bros. Interactive was responsible for all three Hobbit games (with the exception of the Wii U port). Warner Bros. Interactive planned to release the game in Europe in Summer 2014 and North America in Fall 2014. However, the game was not released in those regions, and was instead released on the same day as the game's final release, December 4, 2014. Warner Bros. Interactive Entertainment has announced that The Adventures of Tintin is coming to
