Report Builder was the predecessor of Microstation, but was not directly compatible with it, and has been replaced by the Microstation Export feature. The current Windows development tool for AutoCAD, the Visual Studio plug-in for AutoCAD, supports AutoLISP and Visual LISP development. AutoLISP is the programming language used to write macros and scripts for AutoCAD. AutoLISP is a very powerful programming language, particularly for numerical calculations, and is used for the development of Autodesk's AutoCAD plugin. Other CAD software applications also use AutoLISP. AutoLISP is similar to AutoCAD's AutoCAD Scripts, which are also used to automate routines, but AutoLISP is more powerful and flexible. This ruling is neither surprising nor particularly relevant to the case at bar, since the trial court did not find, nor is it asserted, that either the rental or the owner of the vehicle was negligent in maintaining the condition of the brake linings. The defendant herein was charged only with failing to use due care to inspect the brakes. We find that there was sufficient evidence for the jury to conclude that the defendant was negligent in failing to inspect the brakes or to discover that they were unsafe. The defendant, on several occasions, had access to the vehicle, and had an opportunity to inspect the brakes, while it was parked and unattended. He never did so. Therefore, we affirm the jury verdict and the judgment. For the foregoing reasons, the judgment of the lower court is hereby affirmed.

The early 50s are so rich in history, style and elegance, but what if you could actually buy one of these cars today? The answer is a resounding yes, and we take a look at some of the best examples around. The 50s were a time when American cars really did redefine the world with style, practicality, and good design, but this period also included the notorious consumerism and widespread environmentalism that is currently affecting our world. To celebrate the 50th anniversary of the beginning of the automobile, Chevrolet introduced a limited run of 1,000 cars in 1955. The result was the 1953 Chevrolet Corvette. The Corvette became a worldwide success and with the added success of the hugely popular
