A hardcore fantasy RPG where combat is exhilarating and online play is epic. The story centers around a land occupied by humans and monsters that are struggling against each other, and where three heroes unite with the Elden Ring to become the first-ever Elden Lord. The story begins with the new hero Tarnished, who traverses the world, and brings his friend Kai to join him. Kai is from another world, and possesses a powerful sword and armor capable of attacking all monsters at once. The heroes then face off against the monsters that have been preventing Tarnished from gaining power, and are joined by a mysterious dark-haired girl named Lina. The heroes are able to make allies from other races by defeating them, and can even obtain a powerful monster by defeating it. In addition to this, each new alliance between two heroes yields powerful weapons and armor. The battle system combines Elements, an overabundant number of actions, with the potential to deal or receive damage. A special system for countering an enemy's attack is also included. Together with a robust crafting system, a vast, unique world awaits you! (CNN) -- A massive explosion ripped through the north tower of the World Trade Center in New York Tuesday, and fire officials said a primary jet impact is likely to blame. "It's the worst fire I've ever seen in my career, that's for sure," New York City Fire Commissioner Thomas von Essen told CNN. He said it was the worst he has ever seen. The "sausage-like" building, located at the southwest corner of Vesey Street and Church Street in the Greenwich Village neighborhood, had collapsed into its footprint by 12:15 p.m. EDT (1715 GMT), according to the National Institute of Standards and Technology. Officials were investigating whether the plane had a bomb attached to it or was carrying some type of explosive, but they couldn't confirm whether it had hit a building or sidewalk, New York City Police Commissioner Ray Kelly said. The police department received a call around 12:03 p.m. (1703 GMT) that the tower collapsed, and fire and police officials and the media rushed to the site, which is about three miles from the World Trade Center. Neighbor Alyssa Amster says, "I can still feel the heat. It shook my entire apartment. The windows were rattling. It sounded like a freight train coming down the street." "We saw people jumping out of the building. We saw fire at the top," said Amster. Leo Forte said, "I was taking a picture at the corner and I saw this big explosion. The building just disappeared in this huge black cloud." At the top of the North Tower of the World Trade Center, floors 11 and 12 were engulfed in flames, and lighted pieces were falling from the building, according to the National Institute of Standards and Technology. "We are responding to the World Trade Center, where a plane has crashed into the building," Fire Commissioner von Essen told CNN. The plane did not hit the building, von Essen said, adding that fire officials were still investigating exactly how it struck the building. New York Mayor Rudy Giuliani said it was a "crash," adding: "As I understand it, there was no attempt to bring the plane down. This was a failure of the airplane to turn back." "It is highly likely that the aircraft hit the building, not the other way around," a National Transportation Safety Board spokesman told CNN. The
